PROCESS TYPES

ONSITE WASTE MANAGEMENT

Onsite waste Management is one of the best ways of Waste Management, our dedicated team supports our clients to segregate their waste at their premises and the same will be transported to our unit for further process.

- **Door-to-Door Collection** – Our dedicated team supports clients to collect waste from their flats/Buildings and send for further process.
- **Dry waste Segregation** – Mixed Dry waste will be brought to our factory for further segregation, into different categories and sent for recycling.
- **Reject Clearance** – Rejects (menstrual cloths, sanitary napkins, disposable diapers, bandages and any material that is contaminated with blood or other body fluids, etc) will be collected separately and disposed in an eco-friendly manner.

OFFSITE WASTE MANAGEMENT

In Offsite waste Management, our dedicated team supports our clients (i.e. bulk waste generators like Apartments, Corporates, industries, Educational Institutions, and others) by collecting all types of waste from their premises and transported to our unit for further process.

- **Dry waste segregation at our Factory** – Mixed dry waste will be brought to our dry waste processing unit and Category wise segregation will be done, further its compressed through hydraulic bailing press, and will be sent to the authorised recyclers.

- **Door to Door Waste collection services.**

• Bailing (Compacting) Services:

Segregated waste brought to the Bailing section for compaction and reducing its volume and making into denser bales, to make transportation viable.

E-Waste Collection Services :

We support to collect E-waste from client premises and handed over to the certified recyclers we have collaborated with.

Barrel Collection Services :

Plastic barrel obtained from industries which contains chemicals are washed ,Grinded and sent to extrusion machine for granulating.
